

REMARKS

The present application is being filed in order to correct errors which occurred in the original application.

As can be seen from the Declaration attached to the Reissue Application, during the amendment of the generic claim during the prosecution, the claim was inadvertently limited to the use of quinolines as the residue that causes the destabilization of the cell membrane in weak acid. The present amendment obviates this error and is supported by lines 55 to 65 of column 7 and further supported by column 9. The fact that the error was inadvertent can be clearly seen from claim 2 of the patent which includes compounds which do not fall within the scope of claim 1 upon which it is dependent.

Therefore, it is requested that the reissue application be accepted and the patent granted.

Respectfully submitted,
Muserlian, Lucas and Mercanti
